**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Information Disclosure Statement*

Information Disclosure Statement provided on 20 April 2005 has been considered.

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Srikantan et al (U.S. Pub No 2002/005612 A1).

3. As per claims 1, 6, 9, 13 & 16 Srikantan disclosed a method for reducing magnitudes of output traffic bursts in a streaming media cache comprises: receiving a request from a first client system for a stream of media data, the stream of media data including a first streaming media data packet and a second streaming media data packet; receiving a request from a second client system for the stream of media data (Page.1, paragraph.7, page.2, paragraph19); receiving the first streaming media data packet from an upstream server, the first streaming media data packet including a delivery time; determining a first modified delivery time for the first streaming media data packet (page.2, paragraph.20); determining a second modified delivery time for the first streaming media data packet, the first modified delivery time different from the second modified

Art Unit: 2143

delivery time; modifying the first streaming media data packet with the first modified delivery time to form a first modified first streaming media data packet; modifying the first streaming media data packet with the second modified delivery time to form a second modified first streaming media data packet; outputting the first modified first streaming media data packet to the first client system at the first modified delivery time; and outputting the second modified first streaming media data packet to the second client system at the second modified delivery time (page.3, paragraph.36 and page.4, paragraphs.46 & 53).

4. As per claims 2, 7, 10, 14 & 20 the method of claim 6 wherein determining the first modified delivery time for the second streaming media data packet comprises adding the first delay value to the delivery time of the second streaming media data packet (page.2, paragraph.26, page.3, paragraphs.36 & page.4, paragraphs.46 & 53).

5. As per claims 3, 11 & 19 the method of claim 16 wherein delaying the packet delivery time for the first packet of data to be delivered to the first downstream client system comprises delaying the first packet of data by a delay factor selected from 0-500 milliseconds (page.4, paragraph.40, lines 1-10).

6. As per claims 4 & 15 the method of claim 3 wherein the first delay value is pseudo-randomly selected from the range (milliseconds page.3, paragraphs.36 & page.4, paragraphs.46 & 53).

Art Unit: 2143

7. As per claims 5, 8 & 12 the method of claim 1 further comprising: receiving a data file from the upstream server, the data file including a payload portion of the first streaming media data packet and a payload portion of the second streaming media data packet (page.2, paragraph.30); and storing the data file in a storage within the streaming media cache (page.6, paragraph.75).

8. As per claim 17 the method of claim 16 wherein the first packet of data is framed (page.2, paragraph.26).

9. As per claim 18 the method of claim 16 wherein the first packet of data comprises streaming media data (page.2, paragraph.26).

### ***Response to Arguments***

In light of applicants arguments new art has been used by the examiner to reject the claims.
